

Class 1 Math Reading

Counting Numbers

Numbers help us count things.

We can count toys, pencils, and books.

Counting is useful every day.

Practice makes counting easy.

Numbers 1 to 100

We can count from 1 to 100.

Numbers help us learn math.

Each number has a value.

Learning numbers is important.

Before, After, and Between

3 comes after 2.

5 comes before 6.

4 comes between 3 and 5.

Numbers follow an order.

Addition

Addition means putting things together.

2 apples plus 3 apples make 5 apples.

Addition increases numbers.

We use addition in daily life.

Subtraction

Subtraction means taking away.

5 balloons take away 2 balloons leaves 3 balloons.

Subtraction decreases numbers.

Subtraction helps us solve problems.

Shapes

A circle is round.

A square has four equal sides.

A triangle has three sides.
Shapes are everywhere around us.

Patterns

Patterns repeat in order.
Red, blue, red, blue is a pattern.
Patterns help us think carefully.
Patterns are fun to learn.

Comparing Numbers

10 is greater than 5.
3 is smaller than 8.
Numbers can be compared.
Math helps us compare quantities.

Measurement

We measure things every day.
A ruler measures length.
Some objects are long.
Some objects are short.

Time

A clock tells time.
Morning comes before afternoon.
We go to school in the morning.
Time helps us plan our day.

Money

Money is used to buy things.
Coins and notes are forms of money.
People use money in shops.
Saving money is a good habit.

Position Words

The ball is on the table.
The cat is under the chair.

Position words show location.

We use them every day.

Big and Small

An elephant is big.

An ant is small.

Some things are large.

Some things are tiny.

Heavy and Light

A rock is heavy.

A feather is light.

Heavy things are hard to lift.

Light things are easy to carry.

Tall and Short

A giraffe is tall.

A rabbit is short.

We can compare heights.

Math helps us describe objects.

Ordinal Numbers

First, second, and third are ordinal numbers.

Ordinal numbers show position.

Ali came first in the race.

Ordinal numbers are useful.

Even and Odd Numbers

Some numbers are even.

Some numbers are odd.

2 and 4 are even numbers.

3 and 5 are odd numbers.

Simple Word Problems

Math problems help us think.

We use addition and subtraction to solve them.

Word problems are part of daily life.
Practice improves problem-solving skills.

Counting Objects

We can count fruits and toys.
Counting helps us understand numbers.
Math is useful at school and home.
Counting is fun and easy.

Fun with Math

Math is everywhere around us.
We use math every day.
Math helps us count and compare.
Learning math can be fun.
