

Class 2 Math Reading

Numbers up to 1000

Numbers help us count large quantities.

We can read and write numbers up to 1000.

Each digit has a place value.

Numbers are useful in daily life.

Place Value

Place value shows the value of digits in a number.

Hundreds, tens, and ones are place values.

In 345, 3 means three hundreds.

Place value helps us understand numbers.

Addition

Addition means combining numbers together.

We use addition to find totals.

Addition can be done vertically or horizontally.

Practice improves addition skills.

Subtraction

Subtraction means taking away.

We subtract smaller numbers from larger numbers.

Subtraction helps us solve daily problems.

Borrowing is sometimes needed in subtraction.

Multiplication

Multiplication means repeated addition.

2 multiplied by 3 equals 6.

Multiplication helps us count quickly.

Tables make multiplication easier.

Division

Division means sharing equally.

12 divided by 3 equals 4.

Division helps us split things fairly.

It is the opposite of multiplication.

Even and Odd Numbers

Even numbers can be divided equally by 2.

Odd numbers cannot be divided equally by 2.

2, 4, and 6 are even numbers.

1, 3, and 5 are odd numbers.

Fractions

Fractions show equal parts of a whole.

Half means one out of two equal parts.

A quarter means one out of four equal parts.

Fractions are used in daily life.

Shapes and Geometry

Geometry studies shapes and figures.

Circles, squares, and triangles are common shapes.

Shapes have sides and corners.

Geometry helps us understand space.

Measurement

Measurement tells us length, weight, and height.

A ruler measures length.

Kilograms measure weight.

Measurement is important in everyday life.

Time

Clocks help us know time.

There are 60 minutes in one hour.

Morning, afternoon, and evening show parts of the day.

Time helps us plan activities.

Money

Money is used to buy things.

Coins and notes have different values.

People save and spend money.

Math helps us count money.

Patterns

Patterns repeat in a certain order.

Number patterns help us predict the next number.

Patterns improve thinking skills.

Patterns are used in math and nature.

Data Handling

Data means information.

We can collect and organize data.

Charts and tables help show data clearly.

Data helps us understand information.

Word Problems

Word problems use math in real-life situations.

Addition and subtraction solve many problems.

Careful reading helps solve word problems.

Practice improves problem-solving skills.

Comparing Numbers

Numbers can be greater or smaller.

452 is greater than 321.

Symbols help compare numbers.

Comparing numbers improves understanding.

Ordinal Numbers

Ordinal numbers show position.

First, second, and third are ordinal numbers.

They are used in races and lists.

Ordinal numbers are different from counting numbers.

Capacity

Capacity shows how much a container can hold.

Liters measure liquids.

Bottles and buckets have different capacities.
Capacity is useful in daily life.

Length and Distance

Length measures how long something is.
Distance measures how far places are.
Centimeters and meters measure length.
Math helps measure objects accurately.

Fun with Math

Math is part of everyday life.
We use math for shopping and counting.
Math develops thinking skills.
Learning math can be fun and exciting.
