

Class 3 Science Reading

Living and Non-Living Things

Living things can grow, move, and breathe.

Humans, animals, and plants are living things.

Non-living things do not grow or breathe.

Tables, chairs, and toys are non-living things.

Parts of a Plant

Plants have roots, stems, leaves, and flowers.

Roots absorb water from the soil.

Leaves make food for the plant.

Flowers make fruits and seeds.

Animals and Their Habitats

Animals live in different habitats.

Fish live in water.

Birds live in nests.

Lions live in forests.

Food and Nutrition

Healthy food keeps us active and strong.

Fruits and vegetables are rich in vitamins.

Milk and eggs help our body grow.

We should eat balanced meals every day.

The Human Body

Our body has many important organs.

The heart pumps blood.

The lungs help us breathe.

The brain controls our body.

Water and Its Uses

Water is important for all living things.

We use water for drinking, cooking, and cleaning.

Farmers use water for crops.
We should save clean water.

Air Around Us

Air is everywhere around us.
We need air to breathe.
Plants and animals also need air.
Clean air keeps us healthy.

The Solar System

The sun is at the center of the solar system.
Earth is the planet where we live.
The moon moves around the Earth.
There are many planets in space.

Weather and Seasons

Weather changes every day.
Some days are sunny and warm.
Rainy days bring clouds and rain.
Different seasons affect our activities.

Light and Shadow

Light helps us see things.
The sun is a natural source of light.
A shadow forms when light is blocked.
Shadows change shape during the day.

States of Matter

Matter has three states.
Ice is a solid.
Water is a liquid.
Steam is a gas.

Force and Movement

Force helps objects move.
We push or pull objects.

Bicycles move when we pedal them.

Balls roll when we kick them.

Sound Around Us

Sound is made when things vibrate.

We hear sound with our ears.

Some sounds are soft.

Some sounds are loud.

Keeping Healthy

Exercise keeps our body healthy.

We should eat healthy food.

Sleep is important for health.

Clean habits prevent diseases.

Plants and Animals Need Care

Plants need water and sunlight.

Animals need food and shelter.

People should take care of plants and animals.

Nature is important for life.

Pollution

Pollution harms the environment.

Smoke causes air pollution.

Garbage pollutes land and water.

We should keep our surroundings clean.

Machines Around Us

Machines make our work easier.

Fans, washing machines, and computers are machines.

Some machines run on electricity.

Machines save time and effort.

Safety and First Aid

Safety rules protect us from harm.

We should be careful while crossing roads.

First aid helps injured people.

Adults should help in emergencies.

The Earth

Earth is our home planet.

It has land, water, and air.

Plants, animals, and humans live on Earth.

We should protect our planet.

Environment Protection

Trees keep the environment clean.

We should plant more trees.

Recycling reduces waste.

Everyone should care for nature.
